

According to the Census Bureau, New York, along with Texas and Florida, spends the most on the cost of school construction. However, despite being among the top three spenders for school construction, the poor condition of too many New York schools sends a clear signal that State and local funding is simply not enough to meet modernization needs.

In New York, as is true in many places around the country, the local school districts rely on the local real property tax to pay for the cost of education, including construction and modernization of our schools.

Ninety percent of the schools report a need to upgrade or repair buildings in order to bring them up to a good overall condition. In other words, 90 percent are less than good. Sixty-seven percent report at least one inadequate building feature such as the roof, plumbing, electricity. Seventy-six percent report at least one unsatisfactory environmental factor such as air quality, ventilation, or lighting. There are computers in the schools, but there is only one computer for every 16 students, 16 students trying to use each computer.

In 1998 and 1999, New York paid \$618 million in interest on school debt. Again, this money comes out of the local real property tax. Sadly, these statistics reflect the condition of school buildings in almost every place around the country.

Two years ago, I conducted a school modernization study in the district that I represent, which is a largely rural district in upstate central New York. It has five small cities, but the rest of the district is largely rural. In addition to finding similar results as those I have just mentioned, I discovered also that nearly one-third of the schools in the New York State district that I represent were built before 1940. More than one-third of the schools surveyed reported being cited for fire code violations at some point within the previous year. Over half the respondents said that overcrowding in their classrooms was a serious problem.

This is costing us. It is costing us in the education of our children and the ability of those children to perform in the future, and it is going to cost our economy unless we face up to this problem.

The Democrats in this House, along with President Clinton and Vice President GORE, believe very strongly that in order to get our schools into the condition that they should be in the Federal Government needs to help local school districts afford to repair and modernize our schools.

We have a bipartisan bill. It is sponsored by Republicans as well as Democrats. It would provide \$22 billion in public bonding authority to help rebuild and repair over 5,000 public schools. This bill would bring \$2.5 billion to New York State alone for school construction and modernization.

The bill is popular in this House. It has 228 sponsors, including a number of

Republicans as well as Democrats. And yet, the Republican leadership has thus far refused to allow for any consideration, any reasonable debate or a hearing on the floor of the House.

According to the General Accounting Office, a record 52.7 million children are enrolled currently in elementary and secondary schools across the country. That number is expected to climb to 54.3 children within less than 8 years. Thousands of new public schools will be needed within the next few years to accommodate rising enrollments.

We cannot expect States and local school districts, relying as they do on local real property taxes, to shoulder this financial burden. We ought to bring this bill to the floor of the House. We ought to give it careful and thoughtful consideration. We ought to give the Members of this House an opportunity to debate and vote on the bill.

The 228 sponsors believe that if that happens the bill will pass and we will provide the relief that is necessary for school districts and the children and the families they serve across the country.

I hope that before we leave here this bill will come to the floor and we will give it the consideration that it needs. The future of our country and specifically the future of our children and communities all across America depend upon modernizing our schools, providing these school construction funds.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. LATHAM) is recognized for 5 minutes.

(Mr. LATHAM addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

AMERICA'S BETTER CLASSROOMS ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mrs. CAPPS) is recognized for 5 minutes.

Mrs. CAPPS. Mr. Speaker, I am pleased to follow my colleague the gentleman from New York (Mr. HINCHEY) in speaking about our public schools.

Once again, I rise to express my deep concern over the state of the schools across this Nation, which are overcrowded and in disrepair. In these precious last few days of the 106th Congress, I call upon our leadership to pass comprehensive school modernization legislation.

I strongly believe that education is a local issue, but overcrowding is a local problem which deserves a national response.

Just 1 month ago, I stood here holding a letter signed by over 300 students from Peabody Elementary School in Santa Barbara, California, expressing their desire for passage of school construction legislation.

At this school, students receive a top-notch education. Unfortunately, the students also feel the disturbing effects of overcrowding. This is a school built for 200 students, but now it has an enrollment of over 600.

The added portable classrooms take up precious playground space, which should be used so that students can take part in physical education and activities.

I have visited other schools in my district which suffer from similar circumstances. In Santa Maria, the Oakley School's enrollment is currently over 800, while the school was originally built for 480 students. The first of four lunch sessions begins at 10:30. The last children do not finish until well after 1:30 in the afternoon.

In San Luis Obispo County, Cambria Grammar School was built to handle 200 students. With eight portable buildings, they now have 345. Students have very limited playground space here, and their kindergarten needed to move to a nearby middle school because of overcrowding. This kindergarten is now housed in a portable room with a small, fenced-in playground.

I spent over 20 years as a school nurse in the Santa Barbara school system. I have seen firsthand the damage that deteriorating school buildings can do. Students cannot thrive academically if they are learning in overcrowded and crumbling buildings at the most crucial time for learning in their lives.

We simply must do better for our students. I strongly support the America's Better Classroom Act. This legislation enjoys bipartisan support and has 225 cosponsors. It would provide approximately \$25 billion in interest-free funds to State and local governments for school construction and modernization projects.

Such funding would help schools like Peabody, Oakley, and Cambria Grammar School to make improvements in classrooms and playgrounds that would help reduce class sizes.

When I think what our local educators are forced to deal with and the struggle they are engaged in to address all these problems, I am awed and impressed by how they pull it off each day. They all deserve our most heartfelt appreciation, and I applaud them for the work they do.

I believe that Members of Congress should come to the Central Coast of California and see the crowded conditions that students and faculty must contend with on a daily basis. Then I think we could see some action.

Here in Congress we must set our standards high to ensure that all children have a healthy and safe start. All children deserve to have safe, clean, modern schools to attend each day.

So, Mr. Speaker, I join with the students of the Central Coast of California and I ask that we bring H.R. 4094 to the floor for a vote before this session of Congress comes to a close. There is no excuse not to debate this important bipartisan bill. The 106th Congress is
